SUMMARY

A Data Science and Engineering student at RUPP passionate about building data-driven solutions. Skilled in web development, ML, DL, LLM, and data analysis. Eager to learn, collaborate, and contribute to real-world projects. Experienced in teamwork, event organization, and communication through academic projects and volunteer activities.

WORK EXPERIENCE

AI/ML research, Aura Junior: **Dec 2025 – present**

- Conduct research on LLM, machine learning, and deep learning models
- Collect and analyze datasets for AI experiments
- Support research activities related to model development and evaluation

Data entry, Private team: **Aug 2025 – Oct 2025**

- Prepared Khmer–English sentence pairs for machine learning model training and data annotation.

Graphic Designer & UX/UI Developer **February 2025 – Present**

- Designed UI/UX for a web-based Inventory Management System
- Developed frontend interface using modern web design practices

Volunteer – School Event Organizer (Khmer New Year Festival) **April – May 2024**

- Organized school festival activities with a student team.
- Coordinated tasks and communication between volunteers.
- Helped promote the event and encourage student participation.

Leadership & Activities

- Volunteer Organizer – Khmer New Year Festival (High School, 2024)
- Collaborated with student teams on AI and data science projects
- Active member of the Data Science community at the Royal University of Phnom Penh

EDUCATION

High School at 10 January 1979, Siem Reap
2021 – 2024
Bachelor of Data Science and Engineer at RUPP
Jan 2025 – Jun 2028

TECHNICAL PROJECTS

Fine-Tuned LLM for Cambodian Financial Knowledge — Dec 2025 - Present
Technologies: Transformer, Pytorch, Unsloth, Python, Colab, Numpy, Pandas

- Collected and cleaned Cambodian financial datasets for training.
- Fine-tuned transformer-based LLM using PyTorch and Unsloth.
- Evaluated model performance on financial question-answering tasks

Facial Recognition System — Sep 2025 – Oct 2025
Technologies: Python, OpenCV, Jupyter Notebook

- Used CNN with MobileNetV2 for real-time facial recognition.
- Users provide **20 images for training** and **10 images for testing**.
- Achieved **98.9% real-time accuracy**.

Employees Salary Analysis— Aug 2025 – Sep 2025
Technologies: Jupyter Notebook, Data Analysis, Pandas, Matplotlib, Scikit-learn, Python, Seaborn

- Analyzed dataset to understand employee attrition patterns.
- Built and compared multiple models: Logistic Regression, Random Forest, and Linear Regression.
- Fine-tuned the best-performing model and evaluated accuracy.

Frontend and Web Monitor Shop — Oct 2025 – Nov 2025
Technologies: HTML, CSS

- Built responsive UX/UI frontend for an e-commerce monitor shop website.
- Implemented reusable components and modern web design practices.

CERTIFICATE

- KAGGLE - Introduction to programming
- CISCO Python 1 and Python 2
- AI for Education (CADT)
- KAGGLE - Python

HARD SKILL

- Programming Languages: Python, SQL, R
- Frameworks: Django, NumPy, Pandas, Matplotlib, Scikit-learn, Transformer
- Tools: Git, GitHub, VS Code, Word, Excel, PowerPoint, Power BI, Figma, Photoshop, Tableau

SOFT SKILL

- Communication
- Problem-solving
- Collaboration
- Time management
- Creativity
- Adaptability
- Event Organization

LANGUAGES

- Khmer: Mother tongue
- English: Intermediate
